## Preface

Dear Colleagues,

We are excited to bring you the November 2017 Edition of my paGE. In this edition, we have leadership article from Srinath Krishnamurthy. Do read an excellent article from Harini Palaniandy on "Compliance is no more a compromise - Introduction to Capgemini's IAM Solution". Followed by Geek-in-Me article on "Digital Service Management Platform" by Afzal Anwar, Shivani Mishra and Aakanksha Badola.

Get a glimpse of the employee engagement activities in Fun@Work section.

We wish wonderful birthdays to all Scorpios and Sagittarians; and best wishes and success to all those who are celebrating work anniversary this month. Do read our KYC section to know that extra bit about your colleagues. We invite your enthusiastic participation in the my paGE quiz as always.

Don't forget! You can feature in our next edition. Just connect with us and share all your team activities by sending an email to the employee forum team in your respective location.

Please share your articles, suggestions and feedback to [gebuemployeeforum.ig@capgemini.com](mailto:gebuemployeeforum.ig@capgemini.com). Your opinion matters a lot.

Happy Reading...

**GE BU Employee Forum**

# Leadership Speaks:

**Srinath  
Krishnamurthy**  
Director

Greetings for the day !

Do you believe - "2.5+ quintillion bytes = 25000000000000000000+ bytes of data is generated every day. 90% of data was generated in last two years!" Just Google for "Data Never Sleeps 5.0". The report gives a glimpse of what happens online every minute - very interesting.

IT has steadily digitized all walks of our life over the last decade - internet, banking, telecom, medical, services, transportation, energy etc. Much more is happening around us now. Business transactions, social media, messages, logs, sensors, cameras, RFID scans, Geospatial data, events etc. are all generating more and more data.

When Sir M Vishweshwaraiah saw Jog falls, he exclaimed "what a colossal waste of energy!" and later built a dam & hydroelectric power station. On a similar note, identifying this huge volume of data generated, one may wonder "can we build Data dams & bring the data to good use?"

Google, Amazon, Facebook, YouTube, Uber etc. have climbed to top in past 5 years by providing us exciting services. Unlike old-style ones, these organizations have minimal physical assets. Data and IT are driving them. Traditional manufacturing and financial companies are joining the wave on Digital transformation. They are leveraging Big data, Cloud, Analytics, Data Science etc. Gone are the days where data is banked for compliance reasons. Data is now acknowledged as a key ingredient to cash upon and drive business performance. Insights generated from data is expected to lead to smart actions. These advancements are helping customers reach new levels of productivity, work smartly and gain competitive edge. Our Insights & Data team is partnering with customers on this transformation journey.

Business Intelligence tools and techniques maturing at good pace over last decade has made all this possible. Big Data, Cloud & Distributed Computing are helping us store & process huge volume of data effectively. Data Science unearths insights leveraging the stored data. Until now much of Analytics was based on sampling. However now I am convinced that Analytics algorithms powered by Big Data can process on entire volume of data, thereby delivering more accurate insights. Advanced Visualization tools help represent complex information in simple & meaningful way. If we ask the right questions, technology will help us get the right answers quickly. It is up to us to ask the right questions, generate meaningful insights & take smart actions at higher pace than the tools that gather data.

# Leadership Speaks...contd:

This year has been noteworthy. While we worked with customers on transformations, we also aligned to their Hub focus areas – Reuse, Horizontalization, Consolidation, Simplification, DevOps and Agile rigor. Additionally, our emphasis on continuous improvements helped us maintain and exceed delivery quality while we optimized margins to deal with discounts passed to customers. A significant program on Quality Intelligence helped customer save USD 7M per quarter. Reuse initiatives have helped to build credit of over USD 300K. We had 28 yellow belt certified implementations resulting in cost savings of USD 240K. Our EMEA Informatica Support team won the Lean Six Sigma YB award at iSPRINT.

What more? How is it looking ahead? – Trends in Artificial Intelligence, Machine Learning, Augmented & Virtual reality, Chat bots are all emerging to provide services of higher order. Let us be part of interesting future together in shaping better quality of life. Shall we?

---

## PM's Article:

### Compliance is no more a compromise - Introduction to Capgemini's IAM Solution

By Harini Palaniandy

Many regulations doesn't address IT directly but the implications for IT are huge, given that most financial data in the organization flows through computerized information systems. To be compliant, companies must have regular audits that assess the controls that are in place to ensure that data is accurate, unaltered, and offers a true representation of the company's financial position. Hence compliance drives significant spending on IT and IT security.

In today's business world, the need to safeguard financial information and other sensitive data must be balanced with providing necessary access to information and resources and also adhere to strict compliance requirements.

**What is the solution to balance this?** *Identity and Access Management.*

Access management (AM) is the process of identifying, tracking, controlling and managing authorized or specified users' access to a system, application or any IT instance, while preventing access to non-authorized users.

## PM's Article...contd:

All regulatory compliance requirements mandate a review of access for applications (and hosting infrastructure) to ensure that the access is aligned to the users' job responsibilities. Capgemini has been the preferred vendor for IT Governance, Risk and Security projects for several GE businesses for more than 10 years. Globally distributed GRC team comprises of 70+ skilled resources who are certified through industry recognized organizations CISA (Certified Information Systems Auditor), CISSP (Certified Information Systems Security Professional), SAM (Certified Asset Manager) etc. This team Performs audits and testing of information technology (IT) systems, components, processes, including User Access Management, Change Management, Application Security, Data Loss Prevention and so on.. We compete with Big 4 audit firms yet our presence is unique, as we leverage on our development, consulting and operational experience for this engagement.

### **A shift from Traditional way...**

The team has developed an IAM solution... There are currently many vendor solutions available in the market that provides a lot of tools, however these do not provide end-to-end solution for performing and reporting access reviews. The intention of the Capgemini's IAM tool is to provide the ability to collect data directly from the application, perform reviews, and report metrics for all access reviews.

*VOC: "Stage is not a mere place for performers.. Performers take action, move and execute from anywhere!" Thanks to the core team (Sabarish, Rajshankar, Madhusudan, Sandeep, Preetham and other developers) for going the extra mile...*

The innovation journey continues.. stay tuned for more updates.

**Harini  
Palaniandy**  
Senior Manager

# Geek in Me:

## Digital Service Management Platform

By Afzal Anwar, Shivani Mishra, Aakanksha Badola

### Challenges

With the emergence of new content platforms, channels, devices, and formats - and the challenge of maintaining interoperability across these increasingly complex ecosystems - Pearson has embraced a more flexible architecture to remain nimble in the face of rapid change. This expectation is driving IT organizations to move towards more efficient, agile development frameworks to meet the demands of a diverse mix of users and experience. **APIs** can be used to effectively connect your business to your customers, developers and partners.

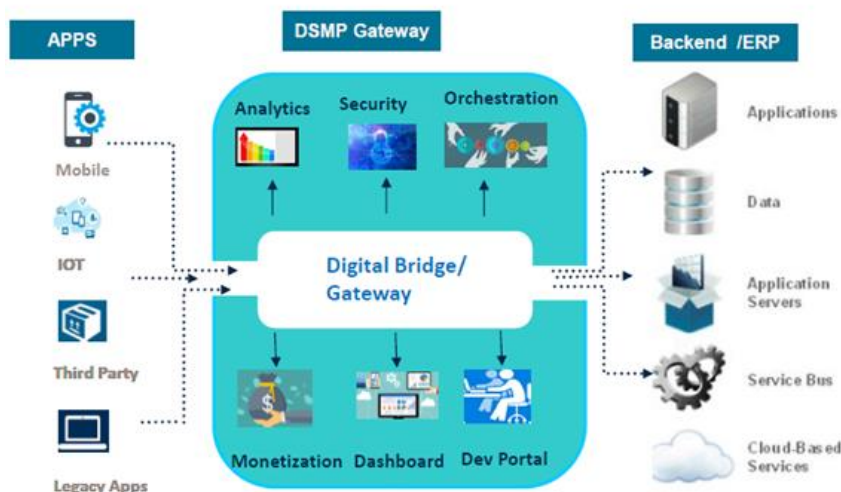

### Capgemini's Solution:

Regardless of location, time, platform, or device, an extensive API framework (**API Management**) can meet the challenge by giving external partners the opportunity to build innovative user experiences /business use case around the existing or build new company's infrastructure. [API Management](#) enables user to create, analyze, and manage APIs in a secure and scalable environment.

API management capabilities are delivered in the cloud as a **SaaS** (Software as a Service) solution, or on-premises in a private cloud, or sometimes using a **hybrid approach**. Build and deliver apps to meet the expectations of customers, employees, and partners, without conceding the stability, reliability, and security of back-end systems (**powered by apigee**).

### Digital Service Management Platform

Digital Service Management platform (DSMP) is pluggable platform to establish secured digital bridge by integrating any source and target end points irrespective of any stack holders like Customers, Partners, and Developers.

# Geek in Me...contd:

## Solution Highlights

- **Security** - Manage access to APIs with security features like OAuth etc..
- **Analytics , Traffic Monitoring** Managing/analyzing the Trends in API traffic
- **Traffic Shaping** ( Rate limitation, Throttling and Load balancing etc.)
- **Compatibility** - Services work across different platforms ,devices and networks
- **Monetization** - Track and bill customers for access to the services usage
- **API Orchestration** (adaptation of multiple services, workflow operations, branching policies, etc.)
- **Deployment Flexibility** (on-premise, cloud, managed service, SaaS,)
- **API Lifecycle governance** (Versioning)
- **Caching and persistence** - caching for runtime persistence of data across requests
- **Developer engagement** (onboarding, educating and managing app devs)

## Other benefits:

- Building integrated applications for total scalability and flexibility
- Ensuring the best possible user experience, regardless of location, channel, or device
- Reduced developer onboarding from months to hours
- Marginal Improvement in operating cost savings and incremental revenue
- Productivity improved by at least 25% by sharing internal APIs
- Track the number of developers who are using the APIs, the number of apps they build
- Increasing the company's focus on making more content available to more audiences
- API Platform serves both internal and external developers

# Know Your Colleague:

## Keerthi Hegde

Analyst / Software Engineer  
Chennai

Hey all, this is Keerthi from the Garden city Bangalore, I was born in Sirsi (Town in Western Ghats of Karnataka) brought up in Silicon Valley Bangalore, I completed my Engineering in The Oxford College of Engineering and started my career with Capgemini on Jan 18 2017.

I love watching movies, Cooking, Painting, Pencil Sketching, and Making Craft works.

I believe life is a beautiful journey and it is left on us about how exciting and adventurous we can make it.

## Sachin Mane

Analyst / Software Engineer  
Chennai

Hello everyone, I am Sachin, from the city of dreams, Mumbai. I am very simple, self motivated, enthusiastic person. I joined Capgemini on 8th August, 2016. I have done my training on system domain in Pune. Currently, I am working for a GE Aviation project in Chennai.

I also loves to listen old music. I always have a positive approach towards life which keeps me going forward.

I love spending time with my family and friends.

I like to play cricket and carrom in my free time. I also love reading Marathi literature. I believe in the ideology – “If you want to shine like a sun, first burn like a sun”.

# Know Your Colleague:

## Spandana Bola

Senior Analyst / Software Engineer  
Chennai

Hello Friends, I am Spandana from Andhra Pradesh and currently working in Chennai. I graduated from RGUKT University. There are 3 members in family. My mother is my inspiration and my elder brother is my strength, because he always understands and supports me and encourages me when I failed. There is one other person in my life, her name is Swetha; she is my bestie. Just hearing her name makes me happy in whatever situation I may be.

I like going out with friends and spending time with my family. Speaking about my professional life, I joined Capgemini in September 2016 as a fresher. Currently I am part of TCG team which is very enthusiastic. I love playing games and fighting with my brother for silly things. In my free time I love listening to songs and watching TV.  
"All Power is within you, You can do Anything and Everything".

## Rahul Kumar Lall

Analyst / Software Engineer  
Chennai

Hi friends,  
I am Rahul, a winsome messed-up human being who wishes to draw the world. I started my life's journey with my first cry on Valentine's Day (of-course a few years back), then I completed my graduation from Maharana Pratap Engineering College (Kanpur).  
And started my voyage as a sun-seeker with Capgemini (erstwhile IGATE), in Nov'16 growing & moving toward my destination. It has been a wonderful journey with the team being Energetic, Motivating and Enthusiastic.

As of my hobbies, I am a big fan of SRK so like watching his movies, travelling, partying and I am foody.  
I truly live by these words: "Don't confine your life with years or tears but with friends and smile".

# Know Your Colleague:

## Rucha Shah

Analyst / Software Engineer  
Mumbai

Hello Friends, I am Rucha from Pune and currently staying in Thane. I have completed my graduation in Pune. We are four members in family. My father is Civil engineer, my mother is house-wife and my younger brother is pursuing his BDS degree.

I like trekking and making new friends. I am fun loving person. I joined Capgemini in March 2017 as a fresher. Currently I am a part of ARAVO PCT team which is very enthusiastic.

As of my hobbies, I love craft work. I love giving handmade gifts. I do origami. In free time I love to listen Bollywood songs and watching TV.

"Believe in your dreams and that anything is possible".

## Pranav Raj

Associate / Software Associate  
Mumbai

Hi Friends, I am Pranav and I am from Pune. I graduated from MITSOM college, Pune. I like to go on adventurous trips and I like read and explore about different gadgets and technologies and also I am a car person. Huge fan of the fastest raging bull, The Lamborghini Aventador.

Speaking about my professional life, I joined Capgemini in May-2017. Now I am part of GE Corporate and I have learned a lot in this BU. I feel blessed to have worked with an awesome team filled with Cooperative, Energetic and Loving members.

Talking about hobbies, I love to play basketball and have represented my college at zonal level. I am also interested playing indoor games, table tennis is my favorite. I have also represented my school at zonal level and was awarded with a bronze medal.

I am greatly inspired by my parents specially their ideologies which have largely affected my life.

"Don't compare your life with others, Everyone has a different journey".
